

## **Prof. Tahir Daşkapan**

**Ankara University, Department of Chemistry, Ankara, Turkey**

Prof. Tahir Daşkapan received his BSc, MSc and PhD degrees from Ankara University in 1990, 1993 and 1999, respectively. In 2001, he received the Post-doctoral scholarship from Scientific and Technical Research Council of Turkey and performed research on the cyclization of organolithium reagents in W. F. Bailey's group at the University of Connecticut, USA (October 2001-August 2002). In 2004, he was promoted to position of associate professor. He is working as a Professor of Organic Chemistry at Ankara University, Science Faculty, Department of Chemistry since March 2010.

He is working in the field of organometallic chemistry. His research interests involve, reactions of organomagnesium, organolithium, organozinc, organocadmium and organocopper reagents. His research group has some publications in these areas and currently focused on C-N bond formation.
